The final presentation of your project. What you can present include but are not limited to the following:

1. Introduce your project in detail.
   - Domain / Feature model
   - Implementation techniques
   - Functionality

2. Which implementation techniques (FOP, AOP, frameworks, preprocessors, ...) are suitable for your project in terms of the following properties and why?
   - Performance at runtime
   - Development with several developers
   - Purchase of functionality from third-party providers
   - Fine-grained extensions

3. What have you learned in the process of implementing your project?
   - Anything you want to share
